PATENT COOPERATION TREATY

From the INTERNATIONAL PRELIMINARY EXAMINING AUTHORITY

WALLACE, Sheila J. LLOYD WISE Commonwealth House 1-19 New Oxford Street LONDON WC1A 1LW **GRANDE BRETAGNE**

NOTIFICATION OF TRANSMITTAL OF THE INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

(PCT Rule 71.1)

Date of mailing

(day/month/year)

07.12.2005

Applicant's or agent's file reference

SJW/46455

IMPORTANT NOTIFICATION

International application No. PCT/GB2004/004954

International filing date (day/month/year)

Priority date (day/month/year)

24.11.2004

24.11.2003

Applicant

RETRACTOTOP LIMITED et al.

- The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary report on patentability and its annexes, if any, established on the international application.
- 2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
- 3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.

4. REMINDER

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary report on patentability. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

The applicant's attention is drawn to Article 33(5), which provides that the criteria of novelty, inventive step and industrial applicability described in Article 33(2) to (4) merely serve the purposes of international preliminary examination and that "any Contracting State may apply additional or different criteria for the purposes of deciding whether, in that State, the claimed inventions is patentable or not" (see also Article 27(5)). Such additional criteria may relate, for example, to exemptions from patentability, requirements for enabling disclosure, clarity and support for the claims.

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SEPARATE SHEET)

International application No.

PCT/GB2004/004954

Re Item III

Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

No opinion is require for claims 9 and 10 as they relate to methods for treatment of the human or animal body by therapy (rule 67.1(iv) PCT).

Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

The document D1 WO 02/102269 A which is regarded as being the closest prior art to the subject-matter of claim 1, shows The document D1 discloses (see paragraphs 02, 26, 71 and figure 15) a dental device (112) comprising a sheath for fitting over a tooth, the sheath carrying a haemostatic agent in at least one region thereof, wherein the sheath comprises a generally cylindrical body having a first end (116+142) open to a cavity and a second end that is closed, and wherein the open end carrying the haemostatic agent.

The subject-matter of claim 1 differs from this known orthodontic bracket in that the closed end is constructed to yield upon application of pressure.

The subject-matter of claim 1 is therefore novel (Article 33(2) PCT).

The problem to be solved by the present invention may therefore be regarded as soften the occlusal pressure applied on the sheath to protect the delicate gingivae around the tooth.

Neither this problem nor the claimed solution are disclosed in the cited prior art.

The solution to this problem proposed in claim 1 of the present application is therefore considered as involving an inventive step (Article 33(3) PCT).

The same reasoning applies, mutatis mutandis, for the subject matter of claim 7.

Moreover, such a dental device is industrially applicable, such that all the requirement of Articles 33(2)-(4) PCT are met.

Dependent claims 2-6 and 8 as such also meet the requirements of Articles 33(2)-(4) PCT

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SEPARATE SHEET)

International application No.

PCT/GB2004/004954

with respect to novelty and inventive step.

'APP Rec'dPCT/PTO 24 MAY 2006

CLAIMS:

- 1. A dental device comprising a sheath for fitting over a tooth, the sheath carrying a haemostatic agent in at least one region thereof, wherein the sheath comprises a generally cylindrical body having at least a first end and a second end, at least one of said first and second ends presenting a circumferential margin carrying at least part of the haemostatic agent, the at least one end carrying at least part of the haemostatic agent is open to a cavity and the other end is closed, and the closed end is constructed to yield upon application of pressure.
- 2. A dental device according to claim 1, wherein the cavity progressively narrows from its open end towards the closed end.
- 3. A dental device according to claim 1 or claim 2, wherein the cavity is domeshaped at its closed end.
- 4. A dental device according to any one of the preceding claims, wherein the generally cylindrical body comprises a wall between said first and second ends at least part of the cylindrical wall being stiffened.
- 5. A dental device according to claim 4, wherein the cylindrical wall is stiffened by application of a suitable non-toxic material.
- 6. A dental device according to claim 5, wherein the non-toxic material is gelatin.
- 7. A set of dental devices according to any preceding claim, the devices in the set being of different sizes.
- 8. A set according to claim 7, wherein the devices are colour coded to denote their respective sizes.
- 9. A method of inhibiting or preventing gingival bleeding, the method comprising placing over a tooth, a device according to any one of claims 1 to 6.

10. A method of retracting gingivae, the method comprising placing over a tooth a device according to any one of claims 1 to 6 and, optionally, applying pressure to the device.
